

CABLELINK 75™

watch TV wherever you want

Sharp images and perfect sound.

*Connects directly to the antenna socket;
built-in TV tuner.*

MARMITEK

CABLELINK 75

- The first 'wireless antenna box' on the market.
- Watch your favourite TV programmes wherever you want, in any room or even in the garden. You are not dependent on antenna sockets or cables.
- Perfect images and sound, wirelessly through walls and ceilings.
- Also suitable for wireless transmission of images and stereo sound from your DVD player, VCR or satellite receiver.
- Including 5in1 multifunctional remote control for use with the CableLink 75, but which is also suitable for your TV, DVD player, VCR and satellite receiver. This signal also goes through walls and ceilings!

HOW DOES IT WORK?

It's very easy. The set consists of a transmitter and receiver. The transmitter (A) has a built-in TV tuner that can select any channel. This channel is then transmitted wirelessly (through walls and ceilings) to the receiver (B), which is connected to your TV.

You can use the remote control included in the set to select your channels, by aiming it at the receiver.
